

Mohammed Zaid

AI-Assisted Developer

Education

Higher Secondary Certificate — N.E.M.H.S.S, Bhilai

Expected graduation: March 2028

Relevant coursework: Biology

Experience

AI-assisted Backend Developer

Personal Projects

July 2026 | Daily Routine Scheduler

Tech: React; Node.js; Git; (MongoDB/Firebase if used)

- **What it does:** A responsive web app for creating, scheduling, and tracking daily tasks and routines.
- **Key features:** task creation/editing; recurring schedules; basic productivity tracking; accessible UI.
- **AI role:** Used AI tools to speed up prototyping, generate boilerplate, and assist debugging and documentation.
- **Impact & status:** Usable MVP that improves daily planning; analytics and theming are in progress.

July 2026 | Time Desk

Tech: HTML, CSS, JavaScript

- **What it does:** Provides a clean, distraction-free interface with Clock, Timer, and Stopwatch tools.
- **key Features:** Launcher page with side panel navigation; Separate tabs for each tool (Clock, Timer, Stopwatch).
- **AI Role:** Assisted in structuring UI, debugging layout issues, and documenting workflow.
- **Impact & Status:** Functional and deployed as a demo; Future improvements include enhanced UI themes and advanced timer options.

August 2026 | PlotGraphify

- **Tech Used:** HTML, CSS, JavaScript (PWA concept)
- **What it does:** Designed to generate line graphs from custom data and manage them offline.
- **Key Features:** Data entry via tables, graph customization, export options.
- **AI Role:** Assisted in prototyping and debugging.
- **Impact & Status:** Project was not fully successful but provided valuable learning in PWA design and data visualization.

About Me

Higher-secondary student pursuing a medical career, continuously building projects out of curiosity and looking forward to shaping that curiosity into meaningful contributions for your organization.
